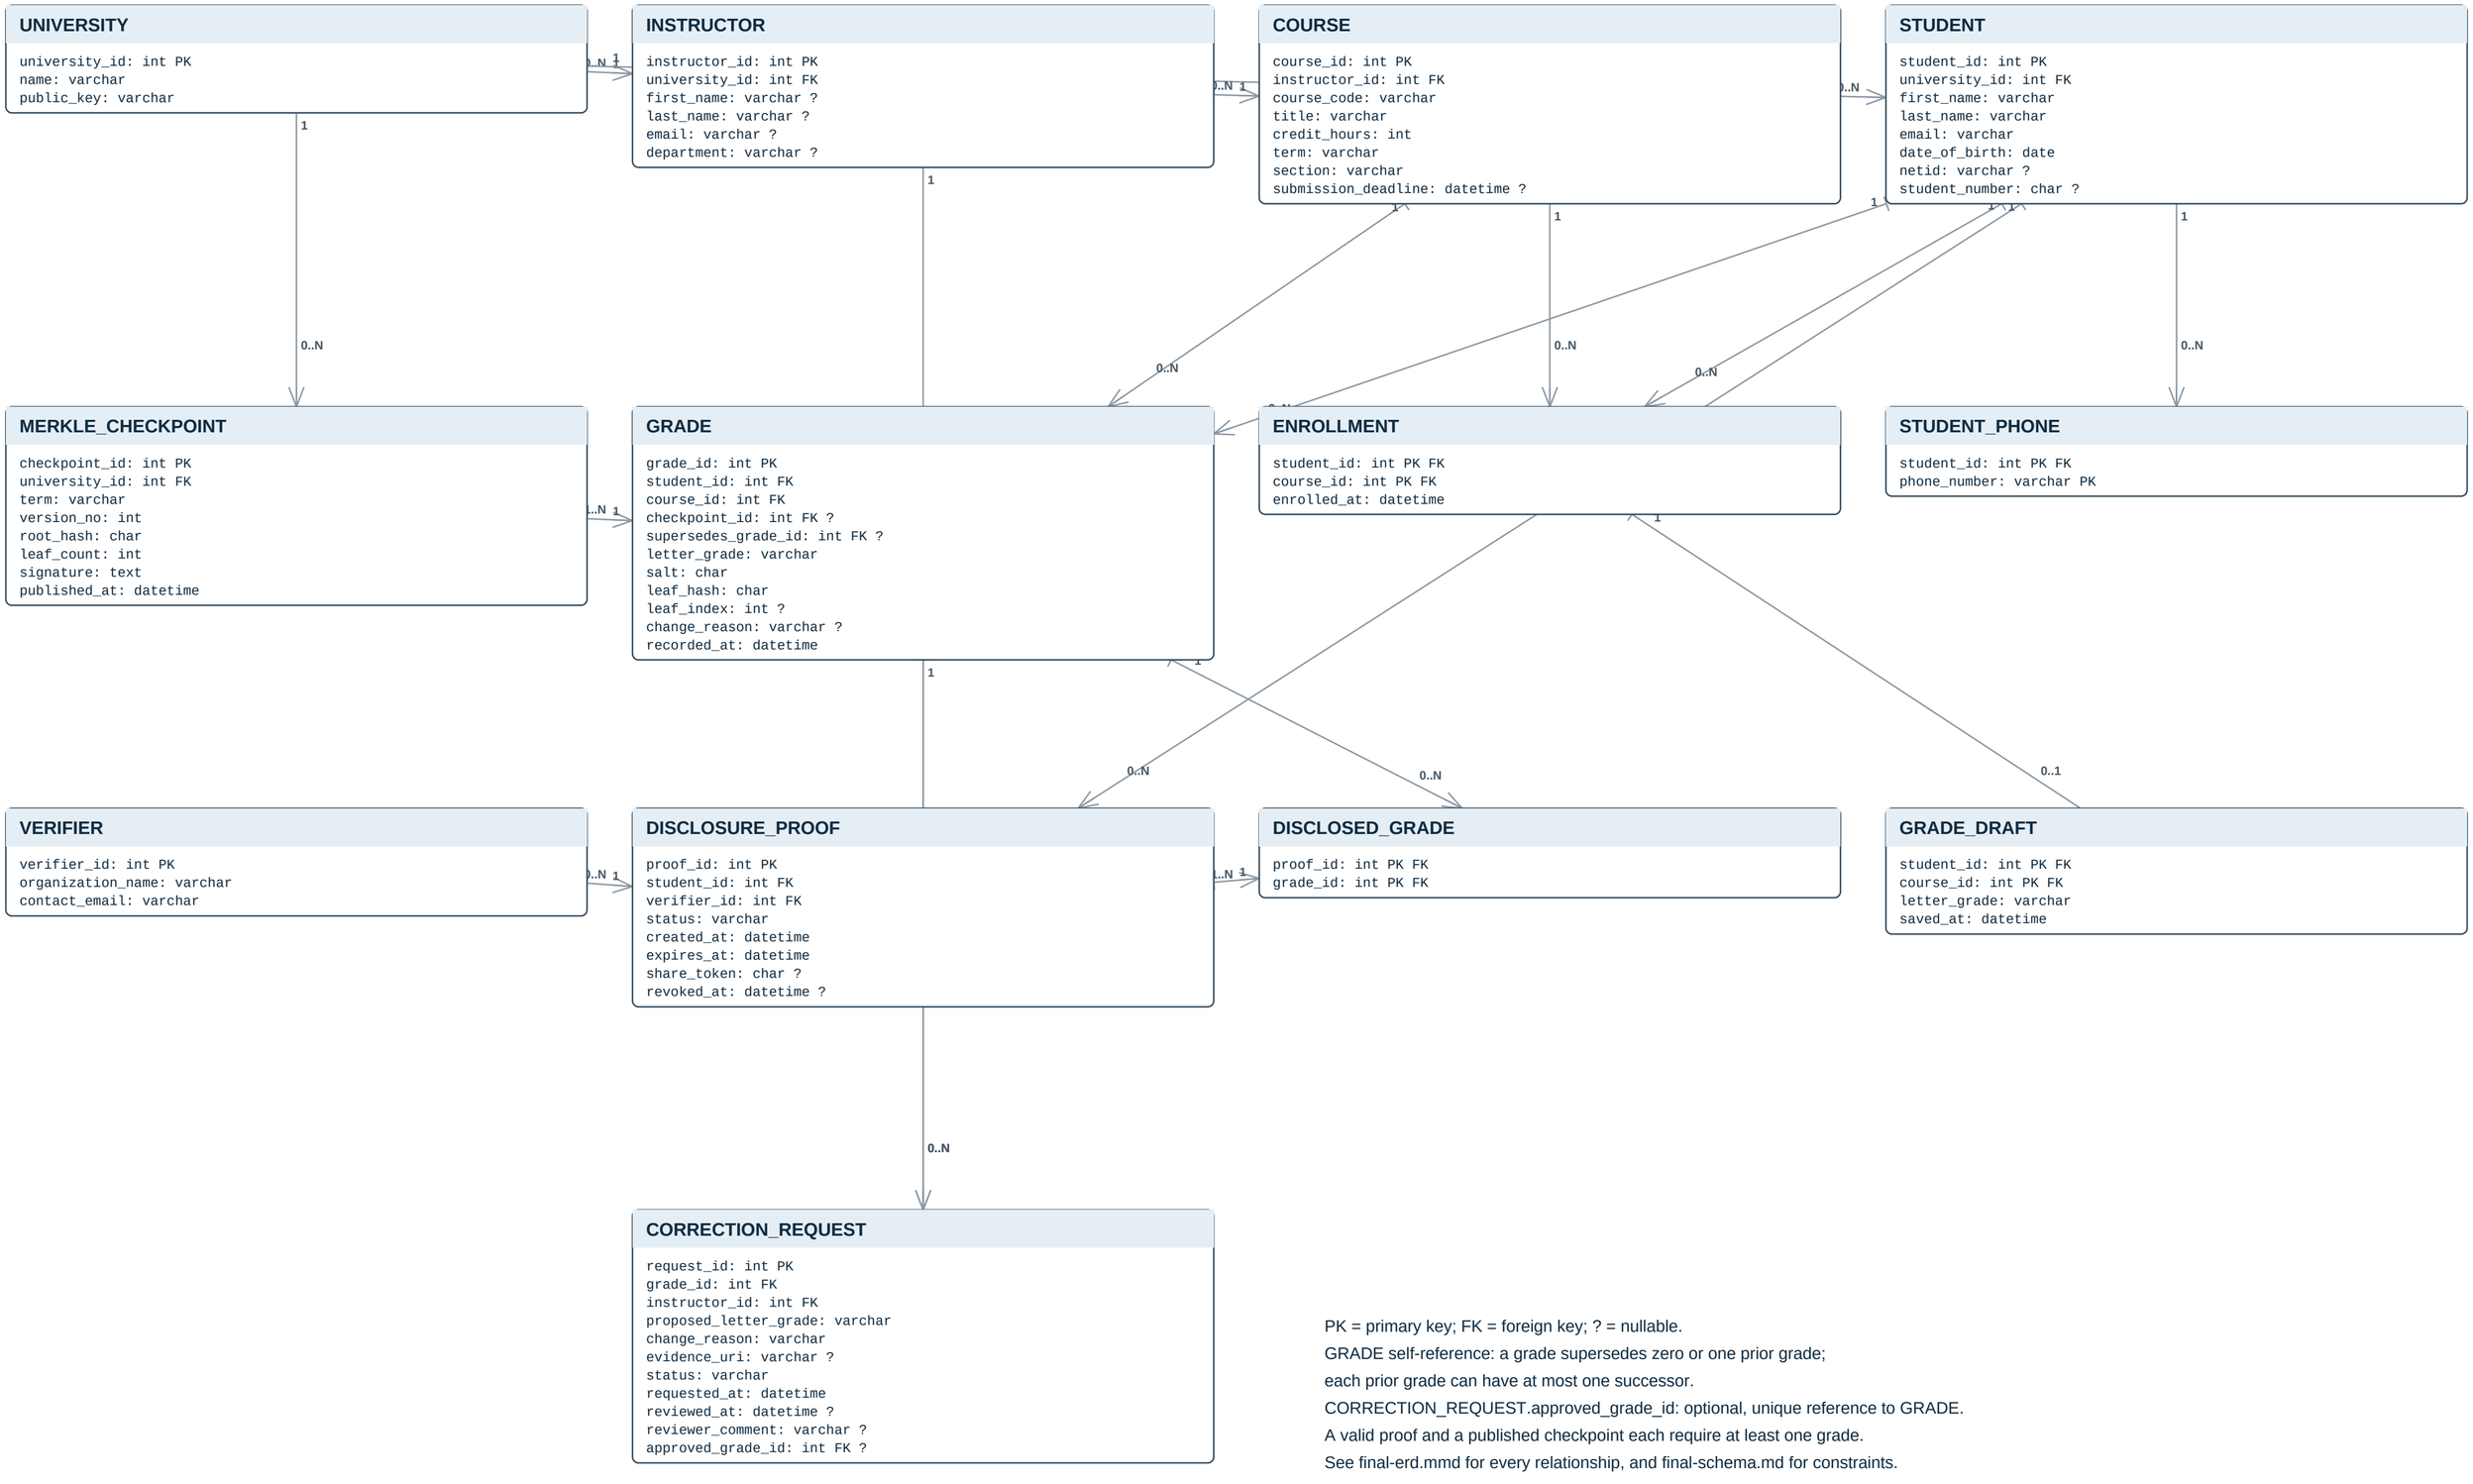
Sigil: final entity-relationship diagram

13 stored relations. COURSE derives its university through INSTRUCTOR. COURSE_CONTEXT is a view.



PK = primary key; FK = foreign key; ? = nullable.

GRADE self-reference: a grade supersedes zero or one prior grade;
each prior grade can have at most one successor.

CORRECTION_REQUEST.approved_grade_id: optional, unique reference to GRADE.

A valid proof and a published checkpoint each require at least one grade.

See final-erd.mmd for every relationship, and final-schema.md for constraints.
